Laser engraving

A method used for permanent marking of objects made of metal, leather, wood, and plastic. The engraving so made is permanent, indelible, and looks very elegant.

Pad printing

Enables making multicolored prints. This technique is characterised by high quality and durability.

Full-color print

A technique that enables making a print employing the full color range. It is characterised by very detailed execution.

Hot stamping

An elegant marking method consisting in embossing a mark together with a gold or silver film. Available with the following packaging types: Giftbox, Casebox, Coverbox, and even Easybox.

Illuminated logo

A special engraving with LED backlighting.

Doming - 3D sticker

A customised sticker is poured over with synthetic resin, thus forming a convex layer. It is a durable (protection against damage and discoloration) and attractive marking technology.

Embossing

A method of making prints consisting in pressing a hot die to leather or leather-like materials.

Box with graphics

For products designated with this symbol it is possible to order a customised packaging.

Glossy / matt film

The boxes of the Print type can be finished with glossy or matt film.

Data uploading

Our USB Flash Drives can be supplied with recorded content such as presentations, catalogues, promotional materials, etc.

Flashlight

Products with a LED flashlight built in.

Wireless

Wireless products with a 2.4 GHz transmitter.

OTG memory sticks

An OTG flash drive has 2 USB connectors - a standard one for a computer and a micro USB one for connecting to a phone or tablet. Note: A given mobile device has to support the OTG host technology.

Accessories

Products designated with this symbol have a range of accessories available, such as: lanyards, snap hooks, chainlets, and cables.

Wireless charging

Charging process has become simpler than ever thanks to using induction for power transfer. Charging of phones and other mobile devices no longer requires using cables.
